

IN THE SPECIFICATION:

Kindly rewrite the Abstract as follows:

ABSTRACT

~~To provide a skin treatment composition for wrinkle reduction that is superior in terms of the wrinkle reduction effect, usability, and the sensation during use.~~

A skin treatment method and composition for wrinkle reduction comprising applying to the skin a composition having a water dispersion of a polymer in which a non-water soluble film-forming polymer is dispersed in water wherein ~~the main~~ ingredients of said film-forming polymer are polyurethane having a film shrinkage rate of 20% or less and an acrylic type polymer having a film shrinkage rate of 20% or less.

~~Also, a skin treatment composition for wrinkle reduction comprising (a) a non-emulsification type cross-linked silicone, (b) a film-forming polymer having a film shrinkage rate of 20% or less containing as a main ingredient a polyurethane having a film shrinkage rate of 20%, (c) a liquid oil component, and (d) water.~~
